

Parental
education

```
graph TD; PE([Parental education]) -.-> E([Education]); PE -.-> I(( )); E --> I
```

The diagram illustrates a conceptual model with three nodes. At the top is a red dashed oval labeled 'Parental education'. Below it is a solid black oval labeled 'Education'. To the right of 'Education' is a solid black circle labeled '\$'. A solid black arrow points from 'Education' to '\$'. Two red dashed arrows originate from 'Parental education': one points down to 'Education', and the other points diagonally down to '\$'.
